SKILLS

React, VueJS, AngularJS, Apollo GraphQL, Docker, AWS, Git, HTML5, CSS
JavaScript, Ruby, Python, Java, SQL

EXPERIENCE

Software Engineer II | *Toast*, Boston, MA   September 2019 - Present
- Leads single-page application frontend for a digital presence portal, enabling restaurants to increase traffic to online ordering platforms
  - Integrates with third-party APIs from Google and Facebook
  - Delivered MVP digital presence portal within two weeks, with production-ready services including feature flagging, behavior analytics, and automated asset delivery
- Developed React frontend and Apollo GraphQL backend-for-frontend (BFF) code rewrite for white label online ordering platform for restaurants, accomplishing a 4x increase in initial page-load times and a superior user experience
- Utilizes comprehensive unit and integration testing techniques

Web Developer | *New York University*, New York, NY   March 2018 - August 2019
- Specialized in modern frontend web development projects in VueJS and AngularJS, with unit, integration, and end-to-end test coverage
- Added WCAG accessibility features to legacy webpages with semantic HTML, CSS improvements, and jQuery for improved keyboard navigation
- Led the development, testing, and deployment of serverless functions via AWS Lambda and API Gateway. Deployed the technology stack with Serverless Framework
- Containerized (Docker) the fullstack web development environment. Images used for testing, asset building, and deployment in cloud-based CI/CD environment CircleCI

Hacker in Residence/JumpStart TA | *App Academy*, New York, NY   Jan 2018 - March 2018
- Taught novice programmers, conducted admissions interviews, and improved internal websites and tools

Enrollment Coach | *Columbia University*, New York, NY   Jan 2017 - Jul 2017
- Implemented Excel data enhancements for admissions management, greatly improving the efficiency of email communications with 1000+ students

Lecturer (Statistics) | *University of the Philippines*, Manila, Philippines   Aug 2015 - Jun 2016

EDUCATION

App Academy | 2017
- Rigorous 1000-hour software development course with < 3% acceptance rate
- TDD, scalability, algorithms, OOP, coding style, REST, security, single-page apps, and web development best practices

Columbia University | 2012. Bachelor of Arts in Sociology, Business Management. 3.63 G.P.A.
- *Curriculum Highlights*: Introduction to Computer Science (Java), Statistics, Calculus III
- Oversaw website redesign and gig tracking for 700+ employment gigs per year as Managing Director Columbia Bartending Agency
